## Profile

Dedicated and detail-focused front-end developer with a track record of creating scalable and user-friendly web applications. Skilled in modern front-end technologies, including HTML, CSS, and JavaScript, with expertise in frameworks like React. Highly proficient in collaborating with teams to deliver intuitive and efficient user experiences. Recognized for problem-solving abilities, adaptability, and a strong commitment to continuous learning and staying updated with the latest advancements in technology.

## Skills

### Languages & Technologies

React, Node.js, Java, JavaScript,  
HTML, CSS, SQL, Git, Firebase,  
Google APIs

### Technical Competencies

OOP, Front-End Development, UI/IX  
Design and Development, Web  
Application Development

### Soft Skills

Quick Learner, Adaptable  
Effective Communication,  
Problem Solver

## Relevant Experiences with Projects

**Total Experience 1.5 years**

**Client:** Scaleup Consulting – Feb 2024 – Dec 2024 – Role - JavaScript Developer (9 months)

**Project:** SavvyESC - The project is to design and build web application leveraging Google Map APIs to provide construction design capabilities to client. Key functionalities I have developed are, Secure User Authentication, Advance Geospatial Mapping features, Integration Payment Processing using Stripe API's and implemented all business defined validations.

### Key Responsibilities,

- ✓ Led the development of advanced user interfaces using React, significantly improving user engagement and interface functionality.
- ✓ Seamlessly integrated front-end applications with backend services, enhancing system scalability and overall performance.
- ✓ Played a key role in creating modular and reusable components, streamlining development processes and ensuring long-term maintainability.
- ✓ Recognized for clear and effective communication with clients and team members, ensuring alignment with project objectives and the timely delivery of high-quality results

**Client:** MQ PACE (OzHarvest) – Jan 2024 – Jun 2024 – Role - Front-end Developer (6 months)

**Project:** OzHarvest - Automate visitor check-in system for OzHarvest. Key functionalities designed and developed were building re-usable React components. Integration features using Rest-APIs to fetch and update user information. Supporting team members on reporting, testing, fixes, client presentation and documentation.

### Key Responsibilities,

- ✓ Implemented reusable React components and integrated APIs to create responsive, user-friendly interfaces.
- ✓ Contributed to the development of a scalable web application using the MERN stack.
- ✓ Collaborated with back-end developers to integrate server-side logic and database functionality.
- ✓ Enhanced front-end performance through code optimization and browser compatibility checks.

## Qualifications

**Bachelor of Information Technology, Macquarie University – Jul 2021 – Dec 2024**

- ✓ Distinction in Advanced Web Development and Mobile App Development.
- ✓ Strong foundation in OOP, version control, and MVC design patterns for building reliable web applications

**Diploma in Information Technology, Macquarie University - Mar 2020 – Mar 2021**

- ✓ Demonstrated collaboration skills to deliver presentations and group projects.
- ✓ Developed fast-learning capabilities to learn technical skills and tools in a shorter amount of time.

**Certifications** - Microsoft Certified Azure Fundamentals – AZ-900
